Natl. Acad. Sci. U.S.A. 99:16899-16903 (2002).
--- FUNCTION: Orphan receptor.
--- SUBCELLUIA: LOCATION: Integral membrane protein (By similarity)
--- SIMILARITY: Belongs to the G-protein coupled receptor 1 family.
                                                                                                                                                                                                                                                                                                                                                                              NUCLEOTIDE SEQUENCE.

Inoue S., Yoshida S., Urakawa I., Mizutani S., Okazaki H.;
Probable G-protein coupled receptor.";
Submitted (APR-2000) to the EMBL/GenBank/DDBJ databases.
-1- SUBCELLUTAR LOCATION: Integral membrane protein (By similarity).
-1- SUMILARITY: Belongs to the G-protein coupled receptor I family.
EMBL; AB041940; BADB3594.1; -; mRNA.
                                                                                                                                  Cytoplasmic (Potential).

Genoscope, Whitehead Institute Centre for Genome Research;
Genoscope, Whitehead Institute Centre for Genome Reseas.
Submitted (FEB-2004) to the EMBL/GenBank/DDBJ databases.
--- CAUTION: The sequence shown here is derived from an EMBL/GenBank/DDBJ whole genome shotgun (WGS) entry which is preliminary data.
--- SUBCELLULAR LOCATION: Integral membrane protein (By similarity).
                                                                                                                      Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       13-SEP-2005 (TrEMBLrel. 31, Created)

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
